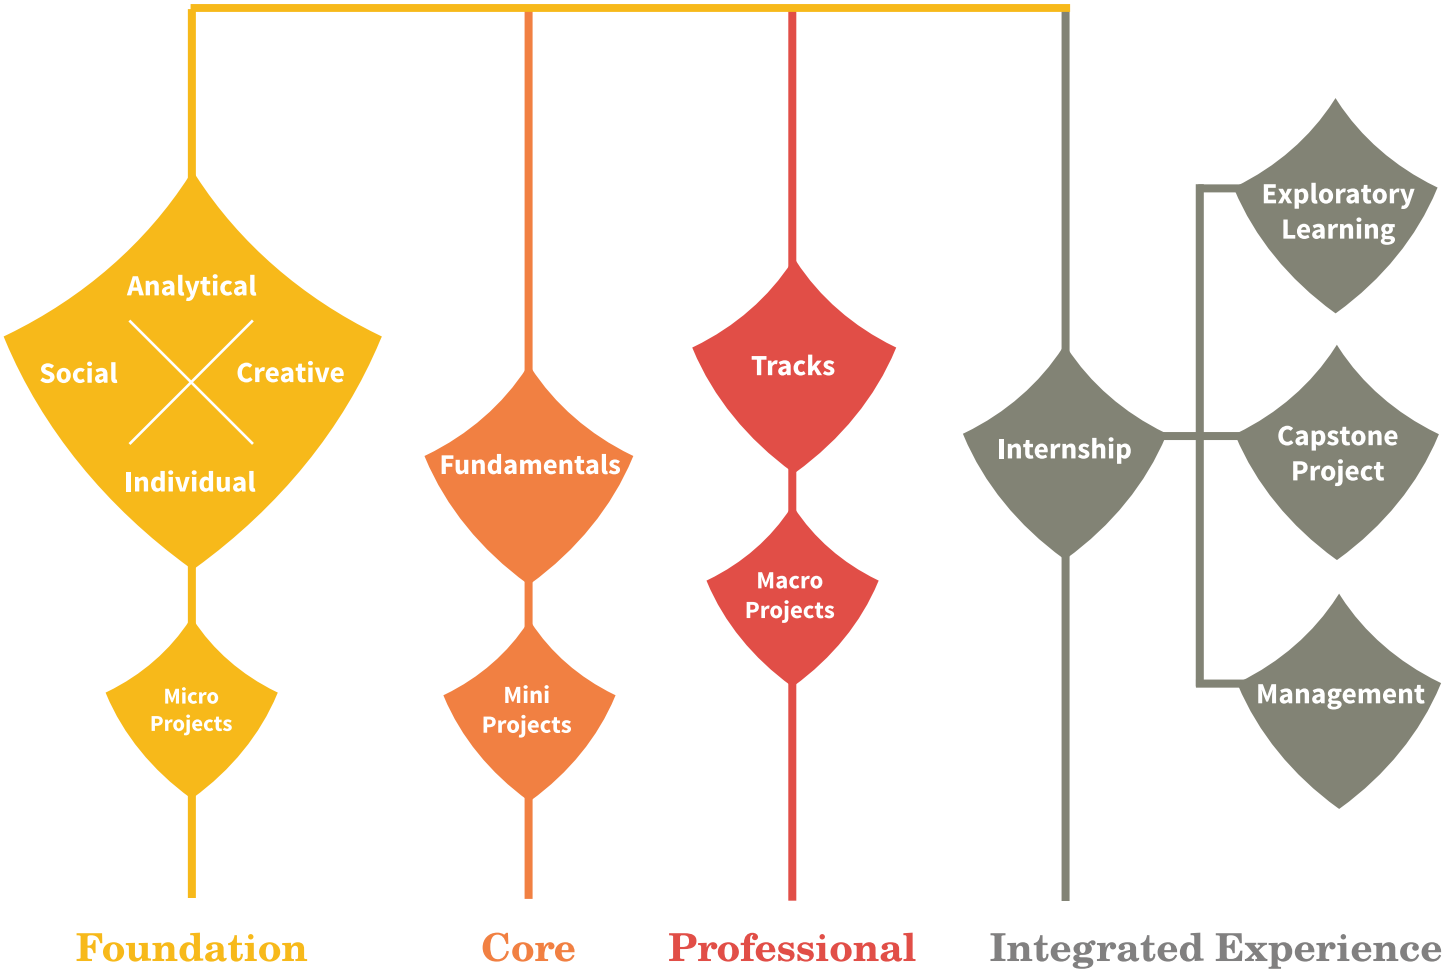
UNIVERSITY

Academics

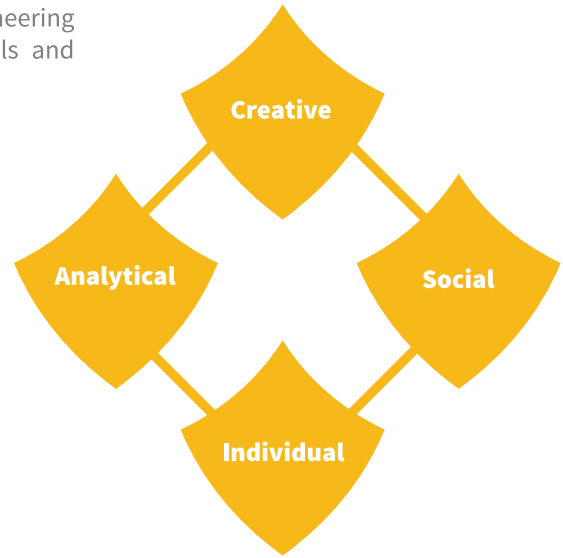
Academic Structure of B.Des Program

The unique academic model at Avantika is based on an integrated cross-disciplinary approach that harmoniously blends design with technology on a solid foundation of liberal arts.



Foundation

The foundation program provides an opportunity to learn by creative thinking and experimentation. A variety of courses like 'Mathematical World', 'Body and Mind', 'Design Thinking' provide an opportunity far beyond the normal practice of teaching in Design and Engineering education. Avantika believes in making learners better individuals and decision makers before shaping them into professionals.



Analytical

- Mathematical World
- Physical World
- Digital World
- Critical Thinking

Social

- Education and Philosophy
- Perception Psychology
- Economics for Creatives

Creative

- Design Thinking
- Creative Arts
- Designer's Toolbox

Individual

- Reading, Writing, Talking, Listening
- Body and Mind

Core

Core is a conceptual framework to learn Design and Technology by using project based pedagogy.

Design

- System Thinking
- Joy of Creating
(Form Exploration and Material Culture)
- Individual and Society
- User Interfaces

Technology

- Computational World
- Analysis and Interpretation
- Motion and Deformation
- Control and Optimization

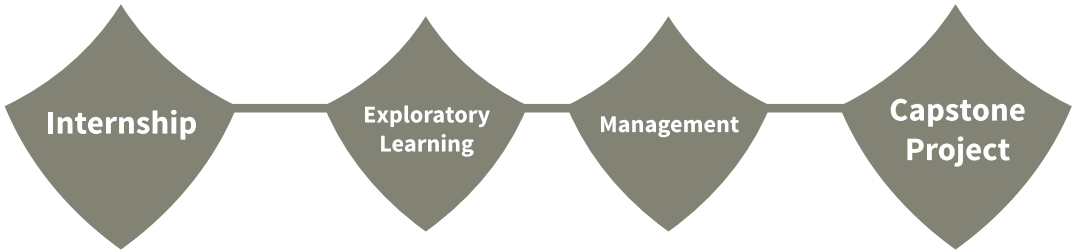
Professional

We offer different Verticals (Tracks) to study & holistically solve wicked, real-life problems to bring about the change. All these tracks will provide a bird's eye view of what is needed to learn. The tracks are a way for students to choose their specialization through immersive learning experiences.

Connected World | Communication
Human Mobility | Transportation
Habitat | Energy
Wellbeing | Health

Integrated Experience

Integrated Experience is a combination of an Internship and a Project. It is a crucial component of the undergraduate program. The focus is on providing immersive learning by execution of solutions based on Industrial/Professional/Academic Experience.



System Design

1. Mathematical World | Physical World | Creative Arts | Designer's Toolbox | Reading Writing Listening Talking

History of Design - Curatotial Space

2. Digital World | Design Thinking | Critical Thinking | Body and Mind | Education and Philosophy

Joy of Creating

3. System Thinking | Design Vocabulary - 2D and 3D | Material Culture | Computational World | Perception Psychology

4. Analysis and Interpretation | Motion and Deformation | Control and Optimization | Individual and Society | Human Machine Learning

Introduction to Professional Tracks

5. Connected World | Human Mobility | Habitat | Wellbeing | Project Design

6. 2 Projects (Based on the above 4 Tracks)

7. Internship

8. Economics of Creatives | Project Management and Entrepreneurship | Self Exploratory | Capstone Project

- Foundation
- Core
- Professional
- Integrated Experience

This is the initial draft of the academic structure

Industrial Design

1. Mathematical World | Physical World | Creative Arts | Designer's Toolbox | Reading Writing Listening Talking

History of Design - Curatorial Space

2. Digital World | Design Thinking | Critical Thinking | Body and Mind | Education and Philosophy

Joy of Creating

3. Storytelling | Manufacturing and Detailing | Form Exploration | Material and Immaterial Culture | Perception Psychology

4. Digital, CAD and Hand Prototyping | Senses and Cognition | Understanding Spaces and Structures | Individual and Society | Human Machine Learning

Introduction to Professional Tracks

5. Products | Spaces | Interaction | Experiences | Project Design

6. 2 Projects (Based on the above 4 Tracks)

7. Internship

8. Economics of Creatives | Project Management and Entrepreneurship | Self Exploratory | Capstone Project

- Foundation
- Core
- Professional
- Integrated Experience

This is the initial draft of the academic structure

Communication Design

1.	Mathematical World	Physical World	Creative Arts	Designer's Toolbox	Reading Writing Listening Talking
	History of Design - Curatorial Space				
2.	Digital World	Design Thinking	Critical Thinking	Body and Mind	Education and Philosophy
3.	Digital Skills	Visual Language	Visual Thinking (Visualisation and conceptualisation)	Design Research	Perception Psychology
	Joy of Creating				
4.	Illustrations through media	Senses and Cognition	Printing and New Media	Individual and Society	User Interfaces
	Introduction to Professional Tracks				
5.	Universe of Brands	Experience and Interfaces	Environment	Physical and Digital Interaction	Project Design
6.	2 Projects (Based on the above 4 Tracks)				
7.	Internship				
8.	Economics of Creatives	Project Management and Entrepreneurship	Self Exploratory	Capstone Project	

- Foundation
- Core
- Professional
- Integrated Experience

This is the initial draft of the academic structure

Who We Are

An MIT, Pune initiative, Avantika University is India's first design university, driven by the spirit of design thinking. It brings a unique academic model that blends meaningful design and technology disciplines. Based in Ujjain, Madhya Pradesh it aims to nurture and cultivate young minds who will function as enlightened citizens.

MIT, Pune was established in 1983 by Prof. Vishwanath D. Karad. Over its 3-decade journey, the MIT Group of Institutions has managed to craft a niche position for being a one-of-a-kind undertaking focused on value-based education. Statistically, the MIT Group nurtures to 50000+ students mentored by 3000+ faculty across 70+ institutes.

Education Pedagogy

Avantika is poised to explore and catalyse and era of creativity, innovation and enterprise. Our objective is to make students better individuals and decision makers before creating professionals. Learners at Avantika will be the harbingers of change, challenging the status quo, look at problems more critically and have the ability to solve them.

At Avantika, we are committed to creating the next generation of Designers and Knowledge Leaders.

PROGRAMS OFFERED:

B.Des | M.Des

Industrial | Communication | System
